Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.

 Highlights: CapMetro, the transit authority in Austin, TX is approved for 5.4M from the Federal Transit Authority to design and construct double railroad tracks from Plaza Saltillo light rail commuter station to I-35. Approval to draw down 5.4M was recently given to CapMetro by FTA in October 2012. Jobs created will be added during the design and construction phases of this project. Former Use: The Plaza Saltillo Railyard Property Site is made up of approximately 12 acres of land located in the area of 4th and 5th Streets, east of Interstate 35, in Austin, TX. The site is primarily vacant land with unpaved parking areas and five leased portions comprised of a scrap metal yard staging area, a market/art gallery, a construction staging area, a scrap yard parking/staging area, and a commercially leased property that appears to be utilized as a residence. On the northern portion of the Site, an active railroad line operated by Capital Metro. The Site is bordered on the north by 5th Street, on the west by IH-35, on the east by Onion Street and on the south by 4th Street. The Phase I Environmental Site Assessment ESA identified many potential RECs at the site based on historical and present day uses. RECs include oil storage/transfer, coal storage, railroad roundhouse, transloading activities typically associated with rail yards and light industrial activities, and scrap metal processing. Also, issues identified in previously completed environmental reports indicate the site may have elevated concentrations of chemicals of concern, primarily lead and mercury in the on-Site soil, documentation of improper waste disposal activities, and a diesel spill reported at 1000 East 4th Street. Several underground storage tanks USTs were reportedly located on or immediately adjacent to the Site and their status and/or presence has not been verified. Without further investigation, these USTs constitute a REC. The VCP/LPST property historic coal gasification facility, currently Austin Metal & Iron Co. located adjacent and to the south, is a potential off-Site REC.

Property Description:	The Plaza Saltillo Railyard Property Site is made up of approximately 12 acres of land located in the area of 4th and 5th Streets, east of Interstate 35, in Austin, TX. The site is primarily vacant land with unpaved parking areas and five leased portions comprised of a scrap metal yard staging area, a market/art gallery, a construction staging area, a scrap yard parking/staging area, and a commercially leased property that appears to be utilized as a residence. On the northern portion of the Site, an active railroad line operated by Capital Metro. The Site is bordered on the north by 5th Street, on the west by IH-35, on the east by Onion Street and on the south by 4th Street. RECs at the site based on historical and present day uses. RECs include oil storage/transfer, coal storage, railroad roundhouse, transloading activities typically associated with rail yards and light industrial activities, and scrap metal processing. Also, issues identified in previously completed environmental reports indicate the site may have elevated concentrations of chemicals of concern, primarily lead and mercury in the on-Site soil, documentation of improper waste disposal activities, and a diesel spill reported at 1000 East 4th Street. Several underground storage tanks USTs were reportedly located on or immediately adjacent to the Site and their status and/or presence has not been verified. Without further investigation, these USTs constitute a REC. The VCP/LPST property historic coal gasification facility, currently Austin Metal & Iron Co. located adjacent and to the south, is a potential off-Site REC.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Texas Commission on Environmental Quality - Agency Central Registry (TX-TCEQ ACR) is a computer application that allows the Texas Commission on Environmental Quality (TCEQ) to use a single, centralized area to record common information, such as the company names, addresses, and telephone numbers of those the TCEQ regulates. It also contains additional IDs (permits, registrations, authorizations, etc) and their status.
